#### 四、閱讀測驗

說明：下面兩篇短文，每篇各有 5 題，為第 41 至 50 題，請閱讀短文後，選出最適當的答案。

While a well-trained doctor is responsible for making correct diagnosis and giving prescription, isn't there anything that a patient is supposed to do at the doctor's? As a patient, in addition to following the instructions that the doctor gives, there are some important things you should pay attention to when you are at the doctor's. First of all, you should clearly describe the pain you feel, and show doctors the affected area. Furthermore, you should tell doctors the medicine that you are taking, including what you have been taking for a long time, and what you are allergic to. These records should be always kept. Finally, when you are about to leave and fill the prescription, you are supposed to inquire the name of the medicine, the effect and the side-effect of the medicine, the way to take it and other important things that you need to know. If there is any new syndrome or if you don't feel well after taking the medicine, go back to the doctor immediately. After all, being a good patient is as important as finding a responsible doctor.

41. When should the records on the medicine one takes be kept?
  - (A) Once in a while.
  - (B) Whenever one needs the records.
  - (C) When doctors tell one to do.
  - (D) The records should be kept all the time.
42. According to the article, which of the following is not the information you need to know when you leave the hospital?
  - (A) The side-effect of the medicine.
  - (B) The name of the medicine.
  - (C) The way to be a good patient.
  - (D) The way to take the medicine.
43. When do you need to go back to doctors immediately?
  - (A) When you feel better.
  - (B) When you don't feel well after taking the medicine.
  - (C) When you finish taking all the medicine.
  - (D) After you recover.
44. What kind of medicine should you keep records on?
  - (A) The ones you are allergic to.
  - (B) The ones you are taking now.
  - (C) The ones you have been taking for a long time.
  - (D) All of the above.
45. An illness can be cured as soon as possible only if
  - (A) the doctor is famous and experienced.
  - (B) the patient follows all the instructions doctors give.
  - (C) the doctor tries his best.
  - (D) the doctor and the patient cooperate and both do their job.

Having no idea what to wear when you are going for a date? Not knowing which piles the clothes that you want are in? If you are living in a smart house, then, all your problems will be solved. Scientists and scholars are designing a smart house in which the closet in it has certain amazing functions that you would like very much. Basically, the closet is linked to a computer with a screen, which will show the pictures of the clothes in the closet. All the clothes are sorted by any categories you designate, such as styles and colors. When you want to choose something to wear, you may simply point to the clothes shown on the screen, and a model wearing these clothes will be on the screen for you to examine whether it is good to look or not. Another great function is that every hanger in the closet has a red light. When you make up your mind on which clothes to wear, the red light on the hanger will show you where the clothes are. Then you don't need to look for what you want in piles of clothes. It is predicted that, maybe in the near future, the closet can detect what degrees the outside temperature is and how the weather is. With the predictability, the smart closet will be able to tell you what to wear, whether to put on suntan lotion, and whether to take an umbrella with you.

46. What is the main idea that the article wants to introduce?
- (A) The functions of a smart house.
  - (B) The way to choose clothes for a date.
  - (C) The closet in a smart house.
  - (D) The high technology applied on hangers.
47. What does the word “**detect**” mean?
- (A) sense
  - (B) forecast
  - (C) determine
  - (D) feel
48. The clothes in the closet are categorized by \_\_\_\_\_.
- (A) styles
  - (B) colors
  - (C) seasons
  - (D) whatever you specify
49. According to the article, which of the following is true?
- (A) The closet is very expensive.
  - (B) The closet tells you when to take an umbrella with you.
  - (C) The closet is smart enough to decide what clothes suit you.
  - (D) The closet offers ways to help you find the clothes you want.
50. The closet in the smart house has so many functions because \_\_\_\_\_
- (A) it is controlled by a computer.
  - (B) it is good at choosing pretty clothes.
  - (C) it has red lights on the hangers.
  - (D) it shows pictures of clothes on a screen.
